

7 R'S of

SUSTAINABILITY

1 REMOVE

Eliminate unnecessary materials and packaging, as well as the Actively participate in the removal of pellets from the environment through the Operation Clean Sweep program.

2 REDUCE

Downsize or optimize products where possible, focusing on freight optimization and energy efficiency.

3 REUSE

Reuse available materials & packaging, and implement Packaging Exchange programs for skids, cores, cradles, boxes, and other similar materials.

4 RECYCLE

Pelletize all possible materials in-house for reuse, use recycled content products and packaging, implemented a company-sponsored Recycle Program.

5 RENEW

Use materials/packaging from renewable resources (non-petroleum based) when possible. We also use alternative, more environmentally-friendly materials, packaging, and energy when possible.

6 REVENUE

Achieve goals at a cost savings or, at minimum, cost neutral.

7 READ

Continually educate ourselves about new innovations, technologies, methods, and materials that adhere to the standards of sustainability.
